## ACCOMPLISHMENTS

- Was one among three to represent DKIT at UCC Coding Competition held in the month of March 2023
- Achieved 'The Employee of the month' Title at Three Store in the first 2 months of joining

I am a highly motivated and semi-experienced professional with a strong background in data analysis and customer service. Skilled in leveraging advanced analytics techniques and machine learning models to extract insights and drive informed decision-making. I am also working on developing a robust trading strategy to fetch historical data through a trading broker's api and build a ML model to predict and automate trades using AWS.

## EXPERIENCE

June 2023 - Current

**Data Scientist at *Adapt***, Dublin, Ireland

- Currently working on an internship at ADAPT,(an internationally renowned company for its research expertise )on an NLP project to build an artificial intelligence chatbot by fine tuning it on a GPT model .
- Applied custom models and algorithms to data sets to evaluate and solve diverse company problems.

November 2022 - June 2023

**Sales Assistant at *Three IE***, Dundalk, Ireland

- I learned the catalogue, products and sold phones and broadbands to customers
- I also helped locate products for customers, place orders and holds, process transactions and keep the sales floor organized and well-stocked
- It was a very new environment for me, but I was soon able to get a grip on it at an early stage.

January 2021 - January 2022

**Data Analyst at *Truecaller***, Bangalore, India

- Gathering and Scrutinizing data by using specialist tools to generate information that helps the company to make decisions.
- Developed SQL queries to obtain complex data from tables in on-site and remote databases.
- Analysed and tracked data to prepare forecasts and identify trends.

January 2020 - January 2021

**Embedded Systems Intern at *Edgate Technologies***, Bangalore, India

- It Introduced me to ARM based Tiva C Series Microcontroller, API level programming on various TIVA peripherals, Introduction to GUI and implementing desktop application Demonstration on the same, the main job role was to design TIVA C microcontrollers.
- Created and deployed system testing plans to back up deployments.
